Shepherd's Close  
Spindrift Close

### 2017 ROAD WORK INFORMATION

This year The Sea Ranch Association is applying slurry seal to approximately one-fifth of the roads on The Sea Ranch. This treatment has proven to be a cost-effective method of maintaining Sea Ranch roads. Unfortunately, this work requires road closures that might inconvenience you.

Slurry seal forms a crust shortly after application but takes time to fully cure. Vehicular traffic on the road during this curing period can damage both the road and the vehicle. We ask that you not drive on road sections closed to traffic. If damage occurs from a person driving on a closed road, the driver will be responsible for the costs of these repairs.

The accompanying schedule will help you to plan your activities around the slurry seal program, and to avoid driving on closed roads. Please remember that this schedule is approximate, since events such as equipment failures or poor weather conditions can require adjustments. We appreciate your help towards completing this necessary work, and we sincerely regret any inconvenience.

*John Prescott*  
*Director of Facilities and Resources*

### FACILITIES CLOSURE Due To Roads Program

All facilities at the  
**Moonraker Recreation Center** will be  
closed September 22nd.
