

ROADSIDE DEBRIS PICKUP APPLICATION FORM

The Sea Ranch Association has a Fuel Management Program designed to protect structures from wild-land fires. One important element of this program is the reduction of fuels from around homes, which is done by individual members. To encourage members to make their properties more fire-safe, TSRA has a program to make it easier for members to dispose of debris. During the months of April through September, TSRA crews will pick up debris placed on the roadside on the third Monday of each month.

Please remember that the program is designed to make minor cleanup of fuels around your home easier. We do not have adequate crew time to remove large quantities of debris generated by major lot clearing or view restoration projects. Our crews will not pick up piles of debris that are more than two cubic yards in size. This is a pile 3ft x 3ft x 12ft, or about the size of two office desks.

Deadline to get on the Pick-Up List is the Saturday preceding the 3rd Monday pick-up. Our crews will only go to the locations on the Pickup list and will miss your pile if we are not notified by the Saturday deadline. Place the materials at the edge of the road as close to the pickup date as possible. Materials placed too early become an eyesore. Only vegetation suitable for chipping will be removed:

**a NO twig-size limbs a NO construction debris a NO garbage
a NO grass clippings a NO materials in plastic bags, boxes**

Would you like a delivery of chips?

Delivery of chips consists of a full truckload of approximately seven cubic yards. If you wish a lesser amount, a stockpile of chips is often available behind the Office Annex (former Activities Center) on Verdant View for hauling off by members.
